Summary

Senior Software Engineer with 5+ years building distributed backend systems for fintech and enterprise SaaS. Designs and operates multi-tenant platforms at national scale — currently an LMS serving 150K+ users across BRAC, BRAC Bank, bKash and Microfinance. Works close to the internals: queue and scheduler design, tenant isolation, and query and cache optimization. Mentors engineers and owns systems end-to-end, from architecture through production.

Technical Skills

Languages: PHP, Python, TypeScript

Frameworks: Laravel, Symfony, React.js, Angular, Node.js, Magento 2

Databases: MySQL, PostgreSQL, Oracle, MS SQL Server

Cloud & Infrastructure: Azure/GCP/VPS (Cloud), Docker, Kubernetes, CI/CD, Git, Linux

Architecture: Distributed Systems, Microservices, Event-Driven Systems, Multi-Tenant SaaS, REST APIs, Caching, Horizontal Scaling

AI Engineering: LLM application design, Bangla speech-to-signal pipelines, natural-language querying over datasets

Certifications: SymfonyCasts Messenger | Anthropic Claude Code in Action | AlgoExpert (100 problems) | Leetcode

Agentic Development: GitHub Copilot, Claude Code, OpenAI Codex, Cursor AI, Google Antigravity

Professional Experience

BRAC IT Services Ltd.

Feb 2025 – Present

Senior Software Engineer

Dhaka, Bangladesh

- Architected enterprise **Learning Management System** serving **150K+ users** across BRAC, BRAC Bank, bKash, and Microfinance with **1500+ concurrent sessions** and **99.9% uptime**
- Engineered automated cloud billing processing **\$50K+ monthly** across multiple entities, reducing reconciliation time by **60%** and eliminating billing discrepancies
- Mentor **5 engineers** and established the code review standard the team works to
- Optimized database queries and **Redis caching**, cutting API response times for the BRAC ERP Reporting service

Software Shop Limited (SSL Wireless)

Jul 2023 – Jan 2025

Software Specialist

Dhaka, Bangladesh

- Designed **ROI analytics platform** for British American Tobacco processing **10M+ records/month** with real-time financial insights and sub-second query performance
- Built **microservices architecture** (Laravel + React.js) for SR Management supporting **2,000+ sales reps** across distributed field operations
- Integrated Azure + Oracle with **99.95% SLA**, and **ELK monitoring** reducing MTTR by **70%**
- Developed **RESTful APIs** serving **50K+ daily active users** with **~200ms** avg response at peak load

Dcastalia Ltd.

Feb 2021 – Jun 2023

Junior Software Engineer → Software Engineer

Dhaka, Bangladesh

- Owned backend architecture for e-commerce platforms handling **100K+ monthly transactions** at **99.8%** payment success rate; trained and reviewed junior engineers on the team
- Architected **multi-gateway payment system** integrating 5+ providers (BRAC Bank, Nagad).
- Optimized **Magento 2 + Elasticsearch** catalog: page load **3.2s → 0.8s (75%)** for 50K+ SKUs
- Implemented **automated testing pipeline** with **80%+ coverage**, reducing production bugs by **60%** and deploy time from 4h to 30min

Key Projects

WeLearn Enterprise LMS – Symfony, Angular, PostgreSQL, Docker

2025

- Architected and scaled a multi-tenant enterprise Learning Management System serving 150K+ users across BRAC, BRAC Bank, bKash, and Microfinance, supporting 1500+ concurrent sessions with 99.9% uptime.
- Implement Multi-tenancy, organization wise data isolation, design multiple modules and lead the team

Report Engine (Service) – Symfony, Angular, PostgreSQL, Docker, Rabbitmq

2025

- A unified reporting platform enabling dynamic report generation from multiple data sources with customizable formats, access control, and filtering. Widely adopted across BRAC IT projects, reducing manual reporting effort and improving data-driven decision-making.
- Delivered multiple feature modules, improved system performance, and enhanced UI/UX, leading to faster workflows and a better overall user experience.

Pickaboo E-commerce – Magento 2, Elasticsearch, Azure, Redis

2022

- High-traffic platform: **100K+ monthly transactions**, **200+ vendor** portal with real-time inventory sync, search discovery improved by **45%**
- **Led backend development**, creating REST APIs for mobile and web, and setting up a dedicated portal for Pickaboo sellers.

BAT ROI Analytics Platform – Laravel, React.js, Oracle, Azure, Redis

2024

- Devised and executed a comprehensive solution enabling precise calculation of organizational **ROI (Return on Investment)**, while effectively tracking revenue, profit, expenses, and investments.
- Enterprise analytics processing **10M+ financial records/month** with complex ETL pipelines, automated **100+ weekly reports** saving **200+ manual hours**

Easy SR Management System – Laravel, React.js, Oracle, REST APIs

2024

- A SR management solution for various industries, enabling organizations to oversee all SR activities.
- Sales force automation for **2,000+ field reps** with offline-first mobile, distributed microservices handling **550K+ daily API requests** at **150ms** avg latency

Education

Ahsanullah University of Science and Technology

B.Sc. in Computer Science and Engineering

Apr 2016 – Nov 2020

Dhaka, Bangladesh
